Edit with WPS Office

A screenshot of a GitHub repository page for the 'certgraph' project. The repository owner is 'lanrat'. The current branch is 'master'. The file being viewed is 'cert_node.go' located in the 'graph' directory. The code implements a 'CertNode' struct to store certificate information, including a fingerprint, domains, and a mutex for thread safety.

```
1 package graph
2
3 import (
4     "fmt"
5     "strings"
6     "sync"
7
8     "github.com/lanrat/certgraph/dns"
9     "github.com/lanrat/certgraph/fingerprint"
10 )
11
12 // CertNode graph node to store certificate information
13 type CertNode struct {
14     Fingerprint fingerprint.Fingerprint
15     Domains     []string
16     foundMap    map[string]bool
17     foundMapLock sync.Mutex
18 }
19
20 func (c *CertNode) String() string {
21     return fmt.Sprintf("%s\t%s\t%v", c.Fingerprint.HexString(), c.Found(), c.Domains)
22 }
23
```
